SUMMARY

Software developer student with hands-on experience building Python and JavaScript applications and troubleshooting real systems. Comfortable with Git workflows, REST APIs, and networking fundamentals; interested in roles spanning development, testing, and production support. Currently strengthening Linux-based development and automated testing.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C#, C++ (coursework), SQL, PHP

Web / APIs: REST, JSON, HTML5/CSS3, React, TypeScript, ASP.NET

Testing / Debugging: bug reproduction, logging, validation, test planning, design pattern

Tools: Git/GitHub, VS Code, Chrome DevTools, Figma, Netlify, Windows

Networking: TCP/IP, DNS, HTTP(S), Wireshark, VLANs

PROJECTS

WebSockets real-time application (ASP.NET)

- Over 100 users can use chat room at a time.
- Update real-time message from user.

IguanaNet Diagnostic Tool (Python, Raspberry Pi, Networking)

- Built a portable diagnostic agent on Raspberry Pi Zero 2 W to support connectivity triage in customer environments.
- Implemented SSID scanning, signal strength measurement, and automated latency checks (HTTP) with structured JSON reporting for support handoff.
- Standardized reproducible test steps and outputs to accelerate root-cause investigation and fix verification.

GitHub Deployment Tracker (React, GitHub REST API)

- Developed a web dashboard that fetches commit activity and repository metadata using GitHub's REST API.
- Built reusable React components and responsive layout (CSS Grid/Flexbox); handled loading/error states for reliability.
- Documented setup and usage in README; used Git branching and pull requests to track changes.

RxAssist Mobile (React Native, JavaScript)

- Created a mobile app prototype for medication and appointment tracking with form validation and persistent user flows.
- Designed component-based screens and stateful interactions to support reliable data entry and navigation.

MyEdMaster Education Platform (Django, Next.JS, React Native)

- Developed a user-friendly website for MyEdMaster LLC that enables 100+ students to self-assess their knowledge across various academic subjects.
- Empowered students to take charge of their learning journey, enhancing their academic performance through self-assessment.
- Host a collection of templates designed to help students identify areas of strength and weakness in their understanding.

Discord Bot (Python)

- Helped 20+ members get real-time updated from League of Legends patch.
- Reduced 30 time to find it from Google.

Sushi Order Application (React, TypeScript)

- Developed an web app to manage 12 table on Server Dashboard
- Notify server whether meal is PREPARING or COMPLETED on Kitchen Dashboard
- Help customer order 15+ cuisine

EXPERIENCE

IDEAWORKS - Mohawk College

Hamilton, ON

Junior AI Research Assistant

Sep 2025 – Present

- Organizing and preparing source materials, supporting data and content validation processes, testing system outputs, and contributing to the development of content for partner applications.
- Assist with validating AI-generated responses against approved project resources and local information sources.
- Support quality assurance processes related to model performance, content accuracy, and user experience.
- Maintain accurate records of project activities, testing results, and documentation.

Binh Minh Mai Restaurant

Hamilton, ON

Customer Service / Operations Support

Sep 2023 – Oct 2025

- Resolved time-sensitive issues during peak service; prioritized tasks and communicated clearly with customers and staff.
- Troubleshoot POS and device issues; documented quick fixes and trained new staff on standard operating steps.

LEADERSHIP & COMMUNITY

Orientation Ambassador — Mohawk College

Hamilton, ON

Student Support

Sep 2024

- Helped 50+ new students set up accounts and navigate digital platforms (Canvas, Wi-Fi, mobile apps) with clear step-by-step guidance.

Gaming Community Web Lead — League of Legends Discord

Da Nang, Vietnam

Volunteer

May 2021 – Dec 2022

- Coordinated UI/theme updates and tested layouts across desktop/mobile; communicated changes and gathered feedback for 20+ members.
